EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

.....

CLAIMS

Claim 29 was canceled.

The status indicator on line 1 of claims 4, 5, 10, 12, 13, 16, 18, 21, 32, 34, 37, 40, 44 and 46 was changed from "Withdrawn" to -Original--.

.....

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: as stated in the Office Action mailed May 18, 2005 and as echoed in the Response of July 12, 2005, Kallok teaches in col. 2, lines 1-10 to apply pulses at a frequency that is too slow to allow a fused tetanic contraction. The applicant's cited range of 3,500 to 7,000 microseconds would appear to result in a fused tetanic contraction. Evidence to this can be seen in Fig. 1c of Kallok who shows a 100 Hz pulse waveform as invoking tetanic contraction. The cited Rigaux et al. reference further adds support to this assertion in par. 0005 where it is stated that the application of 100 Hz pulses to muscle will result in a "...very powerful tetanic contraction." The present invention's recitation of pulses separated by a spacing resulting in an even higher frequency than 100 Hz would therefore appear to be too fast with respect to the frequencies taught by Kallok.

Conclusion

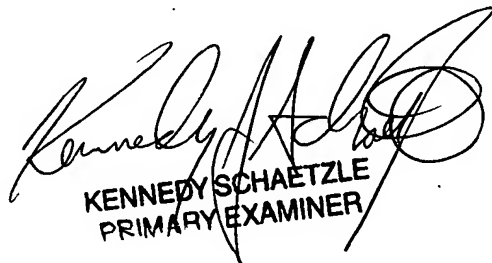

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
